

Pipe Cleaner Figure

1. Fold your pipe cleaner in half. Place the wool in the folded end.

2. Thread both ends of the pipe cleaner through your bead.

3. Carefully slide the bead to the end of the pipe cleaner, leaving the hair showing out of the end. (Be careful not to slide it off the end!).

4. Now bend the rest of the pipe cleaner into arms and legs.

5. When happy with the shape, twist securely into place.
